

Fillauer Named Primary U.S. Distributor of Aether Biomedical's Zeus S Prosthetic Hand

CHATTANOOGA, TN, September 23, 2025- [Fillauer](#) and [Aether Biomedical](#) today announced that Fillauer has been named the primary U.S. distributor of the [Zeus S Hand](#) (Zeus). The award-winning Zeus prosthetic hand was developed by Aether Biomedical, a medical robotics company dedicated to improving patient independence and clinical outcomes through innovative prosthetic technology. Zeus makes daily life easier for patients with features like high grip force and lift capacity, customizable functionality, and quick local repairs that reduce downtime.

As the premier provider of upper limb prosthetic products, dedicated expertise and strategic support, Fillauer is proud to offer the innovative Zeus S Hand as part of its portfolio of products.

“At Fillauer, our mission is to empower both clinicians and patients to achieve the best possible outcomes. We’re proud to partner with Aether Biomedical to bring the Zeus S Hand to upper limb patients across the U.S.,” said Michael Fillauer, Vice President and General Manager of Fillauer.

For clinicians, the Zeus Hand’s cloud-based platform streamlines care with real time adjustments, actionable data insights, and remote configuration tools, making it easier to deliver personalized, effective treatment.

“We are thrilled to partner with Fillauer to accelerate the distribution of the Zeus product line across the United States,” said Dhruv Agrawal, CEO of Aether Biomedical. “This synergistic partnership combines Fillauer’s deep expertise and reach with our commitment to innovation, ensuring clinicians and patients benefit from faster delivery, stronger customer service, and comprehensive end-to-end support.”

Fillauer will begin distribution of the Zeus S Hand today. Fillauer will also supply SPS (part of the Hanger family of companies) with the Zeus S product, so customers can continue to have that ordering option.

About Fillauer – Headquartered in Chattanooga, Tennessee, Fillauer, is a global leader in orthotic and prosthetic innovation that empowers clinicians and patients to achieve their best functional outcomes. With manufacturing and R&D locations in Tennessee, Utah, and Sweden, Fillauer supports a strong upper limb product line, a robust offering of prosthetic feet, a variety of orthotic devices, and a collection of tools, equipment, components, and materials. Founded over a century ago, Fillauer is dedicated to helping individuals with limb loss and limited mobility return to daily activities and achieve new heights.
