

Surestep Expands Pediatric Orthotic Portfolio with New Lower Extremity Solutions

SOUTH BEND, Ind., September 4, 2025 – [Surestep](#), a leader in pediatric orthotic solutions, today announced the addition of six new pediatric lower extremity orthoses to its portfolio, expanding the options available to clinicians and families seeking trusted solutions for children with mobility challenges.

Surestep first gained recognition with the Surestep SMO (supramalleolar orthosis), which revolutionized orthotic management for children with hypotonia. Building on this legacy, Surestep is introducing six new solutions within its Move category of lower extremity orthoses: the Solid AFO, Articulated AFO, PLS AFO, Max Control SMO, Night Stretching Strap AFO, and DASS AFO. Together, these additions broaden the company's head-to-toe portfolio.

With this launch, Surestep has introduced five product categories that simplify how clinicians navigate its comprehensive portfolio:

- Move – Lower Extremity Orthoses
- Grow – Cranial Remolding Orthoses
- Align – Postural Control Orthoses
- Play – Footwear
- Build – Materials & Supplies

“From infancy through adolescence, our comprehensive portfolio, including our new *lower extremity solutions*, grows with every child and is built to meet real-world pediatric care needs with innovative designs and advanced fabrication offerings,” said Surestep Vice President and General Manager Suzi Klimek. “We look forward to working with clinicians and families to help kids access the orthoses they need to live their lives to the fullest.”

With warranty-backed reliability, expert service, and quick, streamlined ordering and delivery, Surestep offers custom orthotic solutions that help children grow with confidence. Surestep's innovative, high-quality devices support movement and development— shaping a future where every child can thrive.
